In vivo conservation of animal genetic resources

In genetics, a mutagen is a physical or chemical agent that changes the genetic material, usually DNA, of an organism and thus increases the frequency of mutations above the natural background level.

Mutagen - Wikipedia

DNA is a long polymer made from repeating units called nucleotides. The structure of DNA is dynamic along its length, being capable of coiling into tight loops and other shapes. In all species it is composed of two helical chains, bound to each other by hydrogen bonds.

DNA - Wikipedia

The page you are trying to access has moved. The Connecticut State Department of Education has a new website. If you have existing bookmarks you will need to navigate to them and re-bookmark those pages.

Learn.Genetics visitors, We're asking for your help. For over 20 years, the Learn.Genetics website has provided engaging, multimedia educational materials at no cost.

Basic Genetics

Our knowledge of genetic variations has been so profoundly influenced by Mendelian genetics that it is difficult to speculate about the ways in which our thinking will need to change with further insights into genomics.
